

Process & Decision Documentation

This document is used to make your design and development process visible. At this stage of your academic career, you are expected not only to produce finished work, but to articulate how decisions were made, how ideas changed, and how collaboration (for the assignments that include group work) unfolds.

In professional and co-op contexts, employers do not only evaluate your final projects in your portfolio. They often ask candidates to explain their process, justify trade-offs, reflect on iteration, and describe their roles within a team.

Entry Header

Name: Abiha Shah

Role(s): the whole thing

Primary responsibility for this work:

Goal of Work Session

Briefly describe what you were trying to accomplish during this phase of the assignment.

- Expressing an emotion in the code

Tools, Resources, or Inputs Used

- No tools used

GenAI Documentation

No Gen AI used by me

Decision Points & Trade-offs

Describe one or two key decisions you made:

Changing the colour

Verification & Judgement

- Kept changes based on the

Limitations, Dead Ends, or Open Questions

Note anything that:

- It was a bit confusing
